

Did you know that not all digital photo booths are the same?

Actually the equipment that each photo booth company uses varies greatly, which is why it is always very important to ask the right questions when searching for a digital photo booth!

You'll want to know why type of system their booth utilizes. Is the booth fully automated (meaning it does everything itself), or does the booth require the attendant to manipulate when the photos are taken and when they are printed? Our digital photo booth is a fully automated arcade-style machine. You and your guests are in complete control and there is no need for any exterior computer or printing components. All of the computer and printing equipment is concealed neatly within our booth for a clean and aesthetically pleasing appearance.

You'll want to know what type of printer they use. Is it a dye-sublimation printer? Or do they use an inkjet printer? Our digital photobooth is equipped with a top of the line dye-sublimation printer. If you expect your photos to last, you will definitely want to make sure the company you choose has a booth printing from a dye sublimation printer. Inkjet printers produce photo strips that fade over time, since the ink is printed on the paper as opposed to a dye-sub, which burns the ink into the photo paper for a longer lasting image.

Digital Photo Booth

We offer digital photo booth (computerized), modern day booths, as well as, [OLD FASHIONED film/chemical \(non-digital\) booths](#).

The digital photo booth is our modern computerized photo booth – it is the same one you see at many malls! This option is great for any type of event including a wedding, birthday party, or even a corporate branding event, bat mitzvah, bar mitzvah! The digital photo booth can be customized with custom backgrounds and custom graphics on the photo booth.
